**Dear Hiring Manager,**

I am writing to express my interest in the Junior Java Developer position. As a recent graduate with a BSc in Information Technology from the University of Mumbai, I have developed a strong foundation in Java programming, web technologies, and software development. Throughout my studies, I have gained proficiency in Java, SQL, and JavaScript, and worked extensively with frameworks such as Spring Boot, Spring MVC, and Hibernate. My hands-on experience includes developing a comprehensive web application, Coupons99, which showcases my ability to deliver a seamless user experience by integrating various technologies.

In addition to my technical skills, I have completed several certifications, including a Full Stack Development Certification and an intermediate Java course, further solidifying my knowledge in both frontend and backend technologies. My role as the Technical Head of Zeal 2024, an inter-college fest, has also honed my leadership, project management, and technical coordination abilities. Projects like the Attendance Management System, which I developed using Java, PostgreSQL, and JDBC, demonstrate my skills in database management and Java programming.

I am confident that my analytical, collaborative, and adaptable nature, along with my eagerness to learn and grow, will make me a valuable asset to your team. I am excited about the opportunity to contribute to your projects and help drive innovation within your organization. Thank you for considering my application. I am looking forward to the possibility of contributing to your team and am available at your earliest convenience for an interview.

**Sincerely,**

**Hamid Ansari**
